2. Spot Buy vs. Contract Governance & Rule Explainer

Rule Classification Methodology: A transaction is explicitly designated as a *Spot Buy* if it matches any of the following criteria:
• **Rule 1 (Single/Infrequent Supplier):** Supplier has <= 2 total orders across the historical dataset.
• **Rule 2 (No Active Master Agreement):** Order does not reference an active Master Service Agreement (MSA).
• **Rule 3 (Ad-hoc Non-Catalog):** Emergency or non-catalog requisition incurring open-market spot rates.
All other requisitions are governed under active negotiated enterprise volume contracts.

Rule Trigger	PO Count	% of POs	Spend (INR)	% of Total Spend
Contract Purchase: Active Long-Term Master Agreement	7,534	88.6%	INR 67,991,553,098	93.3%

4. Strategic Recommendations & Working Capital Roadmap

1. Maverick Spend Consolidation: Shift the top 10 spot buy suppliers into negotiated master contracts to recover an estimated **INR 2.4+ Crores** in annual leakage.

2. Automated 3-Way Match Block: Institute hard ERP payment hold triggers on price discrepancies exceeding 2% or missing warehouse intake receipts.

3. Approval SLA Escalation: Re-engineer IT and Operations managerial approval queues where P90 latency currently exceeds 14 business days.

4. 2/10 Net 30 Capture: Accelerate accounts payable processing for cash discount eligible suppliers to capture 2% rebates on all early settlements.
